

Eindspelen

freddie borghoms

In het eindspel gaan vaak punten verloren. Een gewonnen stand die net niet gewonnen wordt, of waarin remise wordt gegeven, zonder nog maar te proberen. Vaak omdat de winst niet zo gemakkelijk te zien is, maar wel aanwezig is. En het is ook niet altijd gemakkelijk, winst of net niet kan afhangen van één zet die verwisseld wordt. Men kan natuurlijk niet alle standjes in het hoofd prenten, daarvoor zijn er computers die ons vertellen dat er toch nog winst zit in een of anderen stand. Maar door het bestuderen van de systemen kan men wel al een eindje verder raken in het ontrafelen van de geheimen van het eindspel.

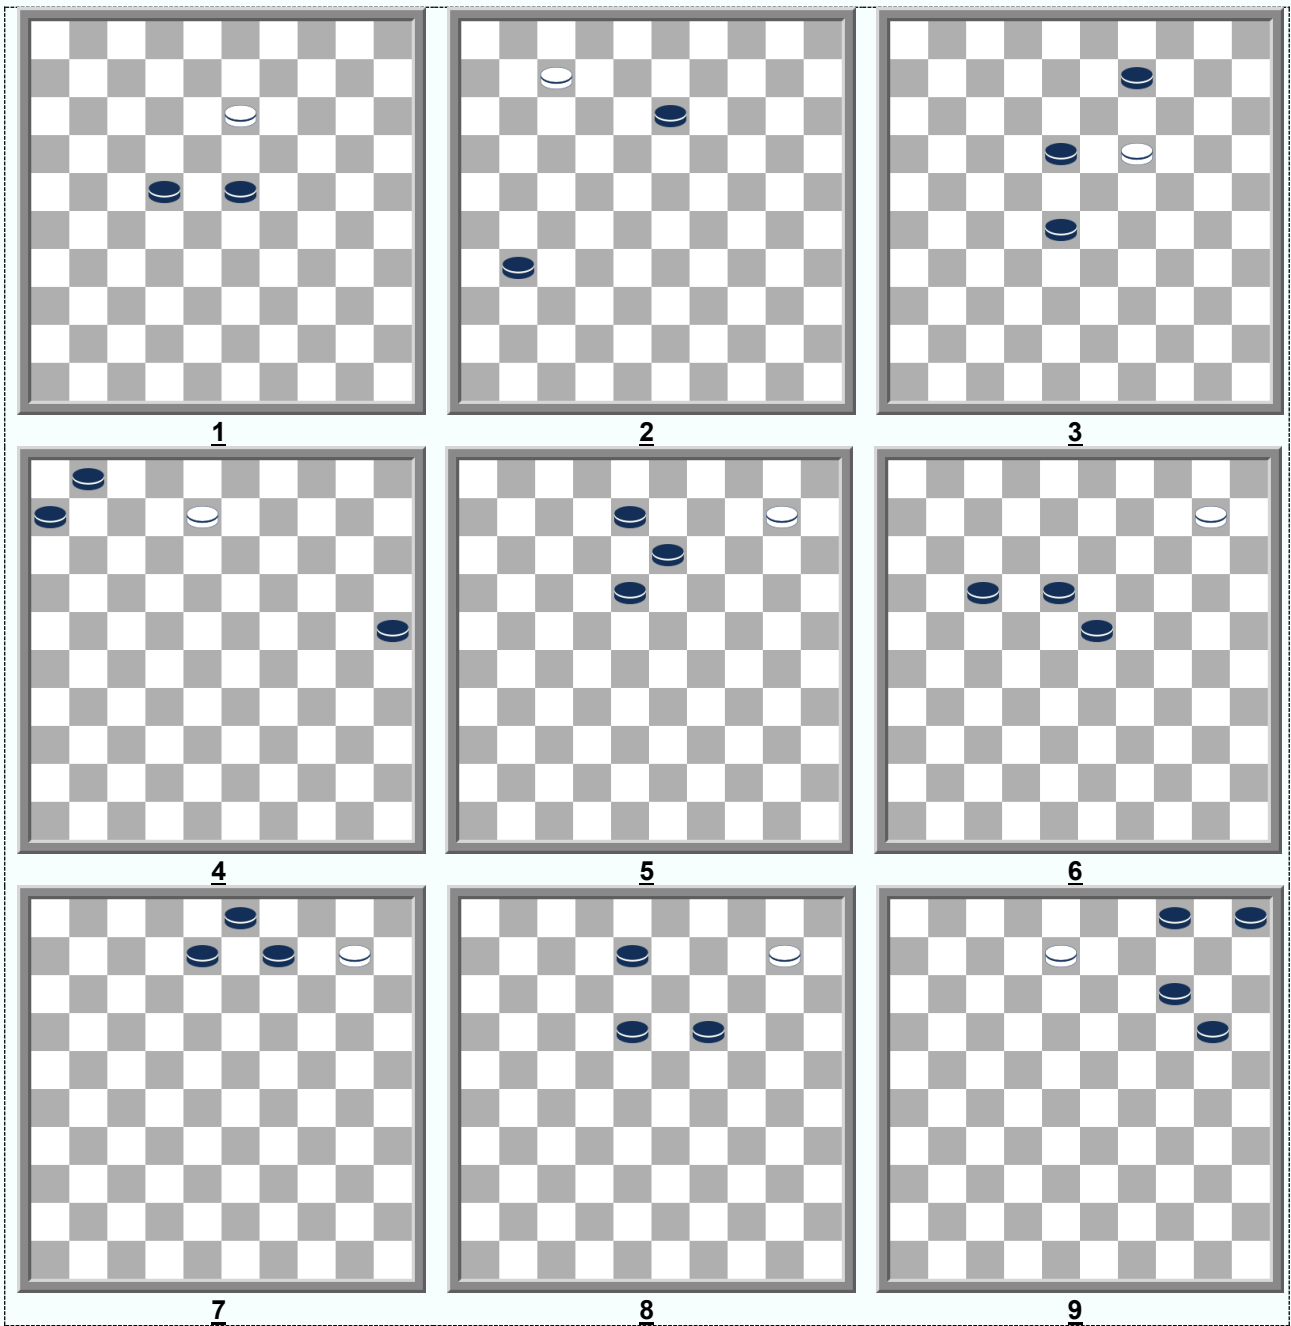

Met onderstaande, ruim 670 standjes hopen we jullie een eind op weg te helpen.

Veel plezier met het ontrafelen van de oplossingen.
