

Draughts / Dammen

Standaardcombinaties, een systematische benadering

Door : **Gerrit Boom**

Uitgever : Christiaan Piens, **PC Blues deel 66**

Herziene uitgave 2023

Inleiding

Het kan niet anders dan dat het totale aantal standaardcombinaties beperkt is, want zelfs ik, met mijn zeer beperkte combinatievermogen, heb direct het oordeel over een combinatie klaar: “dat is een bekende combinatie” of “die heb ik nog nooit gezien”. Dit boek bevat meer dan 800 bladzijden met standaardcombinaties, die gerangschikt naar de slagroute. Mijn doelstelling was om alle standaardcombinaties in één boek te “vangen” en hoewel ik nog steeds met enige regelmaat wijzigingen in de verzameling aanbreng, denk ik dat die doelstelling goeddeels behaald is.

Het begrip standaardcombinatie is niet zo gemakkelijk te definiëren en de meningen daarover zullen waarschijnlijk verschillen, maar toch denk ik dat er wel een algemene consensus over bestaat.

Een standaardcombinatie is een combinatie, waarvan een ervaren speler (men moet men zo'n combinatie vaker zijn tegen gekomen om die te kunnen herkennen) met een behoorlijk niveau (KNDB-rating van om en nabij 1300?) het slagmechanisme herkent. Het is een combinatie die hij/zij vrijwel direct ziet, of op zijn minst wel eens gezien heeft, eventueel op een andere plek van het bord, misschien in een ander stellingbeeld.

Geschoolde dammers ontwikkelen een “zesde zintuig” waarmee men aanvoelt of er “iets” in de stand zou kunnen zitten. Zo'n vermoeden kan gebaseerd zijn op een specifiek slagmechanisme dat geassocieerd wordt met een bepaald stellingbeeld, maar dat zesde zintuig kan ook alarm slaan doordat het bepaalde stellingkenmerken signaleert, zoals (potentiële) gaten in de stand, die de aanwezigheid van een combinatie aannemelijk maken, zonder connectie met een specifiek slagmechanisme.

Standaardcombinaties komen voor in alle moeilijkheidsgraden, ze kunnen simpel zijn, moeilijk of zeer complex. Indien een speler sterker wil worden zal hij of zij alle standaardcombinaties in een partij moeten onderkennen. Spelers met veel talent hebben de gave om die combinaties zelfstandig te vinden van nature; andere spelers kunnen een heel eind komen door studie.

Vooraf voor trainingsdoeleinden lijkt het zinvol om onderscheid te maken tussen standaardcombinaties en niet-standaardcombinaties. Het rendement van een training met standaardcombinaties zal hoger zijn dan een training met niet-standaardcombinaties met dezelfde moeilijkheidsgraad, omdat bij het oplossen standaardcombinaties twee vaardigheden getraind worden, nl. het ontwikkelen van het puzzel- en rekenvermogen én het herkennen van standaardcombinaties, al dan niet in relatie met specifieke stellingbeelden. Daarnaast zullen ook de verschoven en gespiegelde versies van diezelfde combinatie elders op het bord eerder herkend worden. De trainingswaarde van niet-standaardcombinaties is veel lager, omdat die combinaties zelden of nooit in een partij voorkomen (want anders waren het wel standaardcombinaties). Dit boek maakt het mogelijk om een min of meer objectief onderscheid te maken tussen standaardcombinaties en niet-standaardcombinaties.

Wanneer men voor een training een bepaalde moeilijkheidsgraad nastreeft, dan kan men die moeilijkheidsgraad beter zoeken in een context van standaardcombinaties, dan in een (vaak willekeurige) niet-standaardcombinatie.

Van der Stoep stelt in zijn boek “Alle typezetjes”: “We hebben met z'n allen van de naamgeving van de typezetjes een rommeltje gemaakt” en daar ben ik het grondig mee eens. Ik zal me daarom dan ook slechts zeer beperkt bezig houden met combinatienamen, hoe nuttig die soms ook zijn. De meeste standaardcombinaties hebben overigens niet eens een naam en die komen (daarom?) niet voor in het boek van Van der Stoep.

De standaardcombinaties in dit boek voldoen aan de volgende criteria:

- Het slagmechanisme is in het verleden meerdere keren voorgekomen, hetzij uitgevoerd in de partij, hetzij bij analyse.
- Het gaat om een “normaal” stellingbeeld.
- Een minimale complexiteit of verrassing is vereist. De Haarlemmersslag komt in dit boek niet voor.

Veel combinaties kunnen zich voordoen in verschillende vormen of variaties die nét iets afwijken van elkaar. Het aantal variaties kan enorm groot zijn; tenslotte zijn er complete boeken geschreven alleen al over de Coup Royal.

In deze verzameling heb ik vaak slechts één variatie van een standaardcombinatie opgenomen, maar soms ook meer, bijvoorbeeld als me dat zinvol leek vanwege specifieke kenmerken, of omdat dezelfde combinatie voorkomt in verschillende spelbeelden, of omdat er zeer veel verschillende variaties mogelijk zijn, of gewoon omdat die combinatie zeer frequent in de wedstrijdpraktijk voorkomt.

Soms is er sprake van keuzecombinaties, waarbij gekozen kan worden voor twee verschillende afwikkelingen. Ik heb dan één variant gekozen als hoofdvariant met de bijbehorende slagroute. Soms lag die hoofdvariant voor de hand, soms was het een kwestie van een knoop doorhakken.

Samengestelde combinaties, waarbij de ene combinatie gevolgd wordt door een andere heb ik zoveel mogelijk vermeden en opgesplitst in enkelvoudige combinaties, tenzij het gaat om heel kenmerkende gevallen, zoals bijvoorbeeld het zetje van De Heer.

De combinaties in dit boek zijn gerangschikt op:

- de slagroute (van de eindslag). Ik heb er voor gekozen om de route te beperken tot de eerste twee schijven die geslagen worden, omdat die het meest kenmerkend zijn voor een combinatie.
- de herkomst van de eerste vijandelijke schijf, die geslagen wordt in de eindslag.

Achter in het boek is een index opgenomen van de standaardcombinaties, op volgorde van slagroute / herkomst van de eerste vijandelijke schijf in de slagroute.

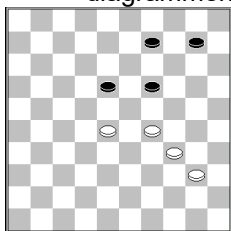

Ter verduidelijking van de begrippen “Slagroute” en “Herkomst eerste vijandelijke schijf die geslagen wordt” geef ik hieronder vier voorbeelden.

Slagroute:

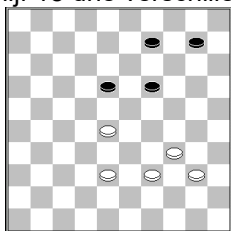

De slagroute is de route die de slagschijf aflegt over de eerste twee schijven die in de eindslag geslagen worden. Van onderstaande vier standen is de slagroute dezelfde, namelijk 34x23x14.

Herkomst eerste vijandelijke schijf:

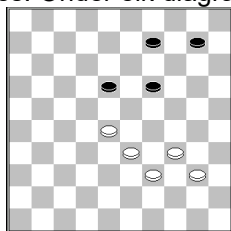

Om de combinatie te kunnen “maken”, moet in elk van de vier diagrammen een zwarte schijf op 18 getransporteerd worden naar veld 29. Dat transport kan plaats vinden over verschillende routes. In deze diagrammen volgt schijf 18 drie verschillende routes. Onder elk diagram staat die route vermeld.

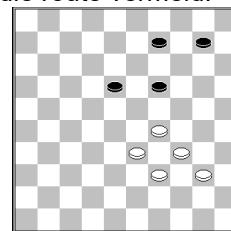

18 (x29, kort)

18 (x27x38x29, lang)

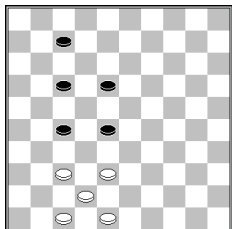

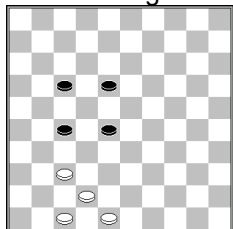

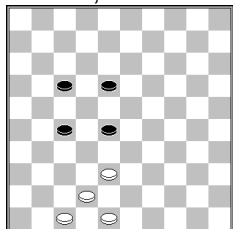

18 (x29x38x29, lang met kaats)

18 (x29x38x29, lang met kaats)

Voor combinaties waarbij het niet uitmaakt hoe zwart slaat, heb ik enige vrijheid genomen m.b.t. de definitie van “ad libitum”, de drie onderstaande diagrammen heb ik alle drie ondergebracht in de slagroute: 42x22 ad libitum.

Slagmechanismes

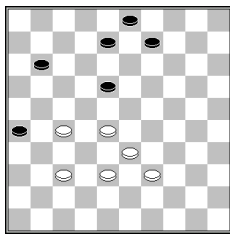

Het onderliggende slagmechanisme van een combinatie kan vaak op meerdere plaatsen van het bord uitgevoerd worden, soms verschoven naar links, rechts, onder of boven, soms gespiegeld én verschoven. Die combinaties staan in dit boek niet bij elkaar, omdat de combinaties zijn ingedeeld naar de slagroute van de eindslag. Om ze toch met elkaar te kunnen verbinden, heb ik een aantal slagmechanismes gedefinieerd en die een nummer gegeven. Achter in het boek staat een tabel met alle slagmechanismes die ik tot nu toe geïdentificeerd heb. Het nummer van een slagmechanisme wordt vermeld bij de combinaties waarin dat specifieke slagmechanisme voorkomt (slagmechanisme: xxxx). Door in het pdf-bestand te zoeken op dat nummer, kan men combinaties vinden met hetzelfde slagmechanisme. (bijvoorbeeld: zoeken op 1064, levert een zee van combinaties op waarin de Coup Springer een rol speelt). In principe kunnen meerdere slagmechanismes voorkomen in één combinatie. Het zetje van De Heer bijvoorbeeld bevat de slagmechanismes 1054 én 1064 (Coup Springer). Deze opzet maakt het mogelijk om combinaties te trainen op een onconventionele manier. Als men een combinatie op één plek van het bord geleerd heeft, dan kan men vervolgens in het pdf-document via het nummer van het slagmechanisme direct dóór naar andere verschijningsvormen van datzelfde slagmechanisme, zowel op andere plekken op het bord, als in de gespiegelde vorm.

Aan de hand van twee voorbeelden wordt het begrip slagmechanisme nader toegelicht.

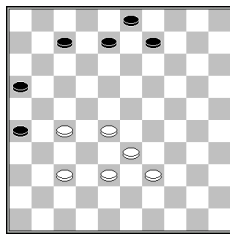

Het Zetje van Weiss

Het Zetje van Weiss vormt een mooie demonstratie van de problematiek m.b.t. de naamgeving van combinaties in de damwereld. Bij “Het” Zetje van Weiss gaat het in feite niet om één slagmechanisme, maar om een aantal verschillende slagmechanismes. Het is een beetje afhankelijk hoe men er naar kijkt, maar ik maak onderscheid tussen vier slagmechanismes. En elk van die slagmechanismes kan dan ook nog eens uitgevoerd worden op verschillende plekken op het dambord, gespiegeld en/of verschoven.

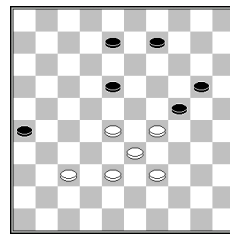

Hieronder die vier verschillende slagmechanismes van “het” Zetje van Weiss in beeld (voor de oplossing zie de tabel slagmechanismes).

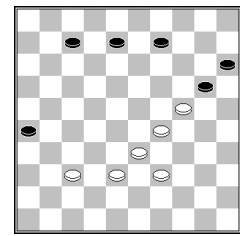

slagmechanisme: 1020

1021

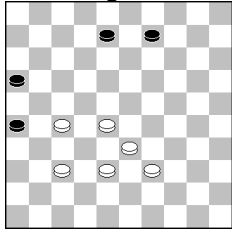

1022

1023

Zoals gezegd kan het zetje van Weiss zich voordoen op zeer veel plekken op het bord, al dan niet gespiegeld en/of verschoven. Voor slagmechanisme 1021 wordt dat aspect hieronder verder uit gewerkt.

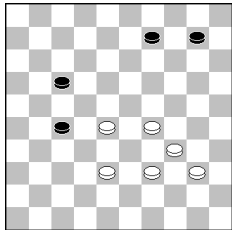

Eerst nogmaals de stamcombinatie van slagmechanisme 1021 in beeld:

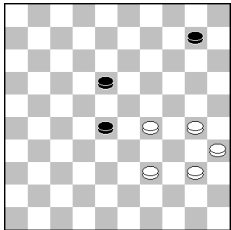

slagmechanisme 1021 (stam-combinatie)

oplossing: 37-31 26x37 27-21 16x27 28-22 27x18 38-32 37x28 33x2/4

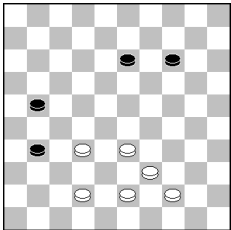

De volgende 6 diagrammen tonen exact dezelfde combinatie, maar ieder op een andere plek op het bord, gespiegeld en/of verschoven.

Het Zetje van De Heer

Het Zetje van De Heer is in velerlei opzichten een interessante standaardcombinatie:

oplossing: 1.48-43 26x37 2.47-42 37x48 3.28-22 17x28 4.33x22 24x42 5.22-18 13x22 6.43-38 42x33 7.39x6 48x30 8.35x2.

(bron: Jan de Ruiter <http://draughtshistory.hoofdlijn.nl/index.php/bekende-dammers/aris-de-heer>)

- Het is een relatief moeilijke standaardcombinatie, die bij Nederlandse partijspelers bekend staat onder de naam "Zetje van De Heer" en die typisch is voor het spelbeeld van een "hekstelling met twee schijven op de lange lijn".
- De combinatie heeft een mooie duidelijke signatuur. Twee bekende combinatie-ideeën spelen een hoofdrol. Schijf 26 wordt in twee etappes getransporteerd naar veld 30. Als voorbereiding gaat schijf 26 eerst naar veld 48. Dan volgt een verschoven Coup Springer (slagmechanisme: 1064, zie tabel slagmechanismes) met als hoofddoel het creëren van een gat op veld 13, dat nodig is om de eindslag te kunnen uitvoeren. Vervolgens wordt via slagmechanisme 1054 schijf 24 verwijderd, terwijl tegelijkertijd de dam op 48 naar zijn eindbestemming, veld 30, reist. Dat alles leidt tot de eindslag 35x2.
- Slagmechanisme 1054 is een mooi voorbeeld van een element dat in verrassend veel standaardcombinaties voorkomt. Men kan dat zelf zien door in het pdf-bestand te zoeken op 1054.
- Het Zetje van De Heer kan niet (zoals veel andere combinaties) verschoven of gespiegeld kan worden. Het is een echte plaatsgebonden combinatie.

Standaardcombinaties

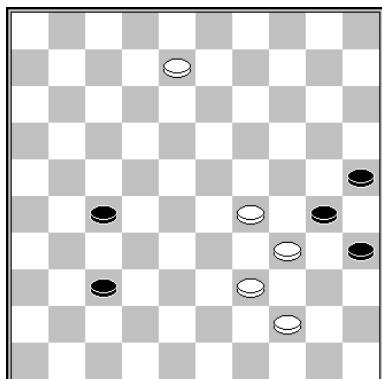

naar

slagroute / herkomst eerste vijandelijke schijf die geslagen wordt

Bij verwisseling van kleuren is het eerste zetnummer correct.

Voor alle diagrammen geldt: wit speelt en wint.

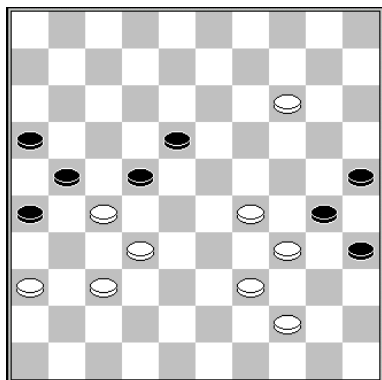

slagroute:	2/3/4x...	herkomst eerste vijandelijke schijf:	25/26/35/36
